## CANSEC SYSTEMS LTD.

---

Founded in 1987 and headquartered in Mississauga, Ontario, Canada, Cansec is a privately owned Canadian corporation specializing in the design and manufacture of leading edge access control systems and related products. Cansec's single greatest strength is our staff's extensive experience in the access control industry. This experience allows us to anticipate market requirements and introduce new products that set the industry standards.

Cansec manufactures a complete line of innovative access control products including the following:

- **Maestro Security Management System** – full-featured and integrated system
- **SmartLock Pro System** - hard-wired and real-time system for basic applications
- **SmartLock UltraLite System** – simple stand-alone system for basic applications
- **Zodiac Fingerprint Readers** - the ultimate choice for biometrics

Setting the standard for all other biometric readers, the Zodiac Fingerprint Reader represents the latest innovation from Cansec. It's small size, low cost, and ease of implementation make Zodiac the ultimate choice for those wishing to upgrade to a biometric solution now!

Cansec also manufactures the SmartLock line of entry-level access control systems. These products are designed for the client with simple access control requirements and a smaller budget.

Our fully integrated Maestro system is also available for the client with more complex requirements, such as LAN workstations, point monitoring, and integrated photo ID badging. Maestro's modular architecture allows the client to start off small with the confidence that the system can be easily expanded without compromising their original investment.

Our diverse offering of access control systems and products are available through a worldwide network of authorized and factory trained security system integrators.
